

Arthur Bricq - Software Engineer

arthur.bricq@protonmail.com · +41 78 681 11 20 · arthurbricq.com
Lausanne, Switzerland

I am a software engineer passionate about computer science, systems programming, and robust software design. I currently work as a Rust protocol engineer at Repyh Labs, building delta.network and cryptographic infrastructure for agentic commerce. Outside of work, I have always enjoyed exploring ideas through personal programming projects. I have lots of pre-AI personal projects, as well as lots of experience with agentic-coding.

EXPERIENCES

- **Rust Protocol Engineer**
[Oct 2024-present] Repyh Labs, building delta.network
Building delta.network and cryptographic guardrails for agentic commerce, using zero-knowledge proofs.
- **Via Dinarica Thru-Hike**
[Apr 2024 - Aug 2024] From Italy to Albania
Long-distance hike along the Via Dinarica, through the Dinaric Alps from Italy to Albania.
- **Software Engineer**
[2022 - Mar 2024] BlueBotics, Lausanne
Embedded programming for robots (simulations in C++ and embedded in Oberon), a Java fleet manager, a Qt configuration UI, and a JS web-app. Also worked on research to improve the robots' localization stack.
- **Software Intern and Master Thesis**
[2021-2022] Flybotix, Lausanne
Designed visual-SLAM localization software that drastically improved accuracy and robustness over their previous solution.
- **Year Abroad in Vancouver, Canada**
[2018-2019] University of British Columbia
Finished my bachelor, following computer-science classes.
- **Mobile App Developer**
[2017 to 2020] EPFL, Lausanne
Developed a complex mobile app for a Swiss retail company at EPFL's Junior Enterprise, and advised on several other mobile projects.
- **Teaching Assistant at EPFL**
Physics, Computer Science, Numerical Analysis & Legged Robotics.
- **Year Abroad in Brasil**
[2014-2015] Sao-Paulo State
Year abroad during high-school

HOBBIES & INTERESTS

All kinds of outdoor sports, running & trail-running, long-distance hiking, yoga, biking.
Programming, computer-science, competitive programming, AOCs, chess, Home Assistant and smart home

SKILLS

- **Programming**
 - **Rust**: My favourite language to work with
 - **Java**: Worked for a backend and for an UI application
 - **C++**: High-performance programming (eg Eigen), 3D programming (OpenGL), Robotics-specific programming
 - **Python**: Development of general purpose softwares, UIs, data-science, machine learning, deep learning and general prototyping
 - **Swift**: iOS development
 - **Javascript** (React, React-Native, Vue.JS and barebones)
 - **Matlab**
- **Agentic Coding**
Claude Code, Codex, Cursor.
- **Electronics**
PCB Design & Manufacturing with Kicad, Microcontroller programming, Motor Control.
- **Software Design**
Design of complex softwares, knowledge of design patterns, knowledge of working in an agile team.
- **Linux**
Linux Proficiency (used at home), ROS2. I also worked a lot with Jetson Nano and with the Raspberry Pi Ecosystems.
- **DevOps**
Docker, Kubernetes, CI pipelines.
- **Mechanical Engineering**
Catia, SolidWorks
- **Languages**
Fluent: French, English; Conversation level: Italian, Portugues.

PORTFOLIO

Find my portfolio on my personal website (at <https://arthurbricq.com/projects.html>).

It contains presentations of some personal projects, realized alone or with friends. Programming being a passion, I always work on these fun side-projects.

EDUCATION

- **M.S. Robotics, GPA: 5.54/6**
[2021] Ecole Polytechnique Federale de Lausanne (EPFL)
Received the **Excellency Scholarship**
- **B.S. Mechanical Engineering, GPA: 5.58/6**
[2018] Ecole Polytechnique Federale de Lausanne (EPFL)
